I have taken my dogs to Adams Mill for years now. All the vets there are wonderful, I trust them all, and when something strange comes up Dr. Adams is an amazing diagnostician.

We have been clients of Adams Mill Veterinary Hospital since it opened. The doctors and staff have taken great care of our pets over the years, and have displayed increasing devotion to each as they matured through their senior years. I wish more doctors that treat us were as good as the "veterinary pediatricians" who look after our loved ones.

I take my dog to Dr. Hirsh at Adams Mill, and am highly satisfied with both her and the facility in general. Indeed, one of the vet techs is a dog walker/sitter and she also is great! You can't miss going here for quality pet care.

I switched to Adams Mill at the beginning of this year. Since then, I have learned a lot about my pets and how best to care for them. Adams Mill takes a conservative view on new meds, but has been willing to work with me to prescribe drugs I've used with my pets from a previous vet. They come up with very good care suggestions and really seem to know their stuff. I've also had to have a dog euthanized there and found them to be very caring and sympathetic in their handling of the situation. All the vets there are outstanding.

Medical care is excellent, and prices are reasonable. The front desk help could be more customer friendly than they are.

NONE BETTER...PERIOD!

Dr. Adams is absolutely the most competent, caring, and compassionate veterinarian I have ever met. She is truly amazing.

My only criticism...she does not charge enough for what she does.

This is the absolute best. No one is more thorough or competent than Dr. Adams. The other doctors and staff are great. If only health care for humans could be this good.

I cannot imagine a better veterinary practice. We have been so happy with them for more than 10 years.

We have used them for years, but feel they are expensive compared to other veterinarians.

The most wonderful care you can get for your pets. The staff is amazing, warm, friendly, empathetic. The doctors are caring and more than competent.

We cannot say enough good things about Dr. Adams and her excellent staff. They found and treated problems either missed or misdiagnosed by other practices. We especially like that the staff work together as a team and genuinely care about their animal patients. Our dogs and cats are definitely in better health than when we first started going to Adams Mill about a year ago.

This is an exceptional clinic in most ways. The vets are very responsible, caring and knowledgeable, and will more than go the extra mile to provide quality care. In particular, they have been very quick to respond to possible emergency situations. The assistants are usually kind and gentle. Unfortunately, a couple of the administrative/office staff have been unpleasant and difficult to deal with, particularly in regard to dealing with prescriptions.

Adams Mill is the gold standard. The admin staff is a little disorganized, but they are friendly. Dr. Adams, Dr. Davis, and Dr. Ball are amazing veterinarians. They will take all the time you need to talk to you about issues and concerns. (probably why you sometimes have to wait forever to be seen!). They are competent, current on available options for various illnesses, recommend alternative therapies (not performed there) like acupuncture. They do not recommend or push unnecessary treatments or medicines. They have been available by phone at various hours with questions. I've never waited more than a few hours for a call from one of the doctors. We've been going here 15 years. I cannot imagine finding anyone else I could so thoroughly trust with my babies.

Our experience at Adams Mill has been very positive. They have provided excellent advice and all of the vets and vet techs have been very friendly and professional. We have made a few emergency calls when our dog has eaten something questionable and their response time has been excellent. They really care. Concerning cost, we've always found them to be very reasonable, based on comparison shopping and talking with work colleagues who also have dogs. Adams Mill - keep up the good work.

Prices are extremely high, and always more than they estimate. Very judgmental/condescending attitude toward pet owner.
